What about us?

BUILD_

"If you want to build a ship,
don't drum up the people
to gather wood,
divide the work,
and give orders.
Instead, teach them to **yearn**
for the vast and endless sea."

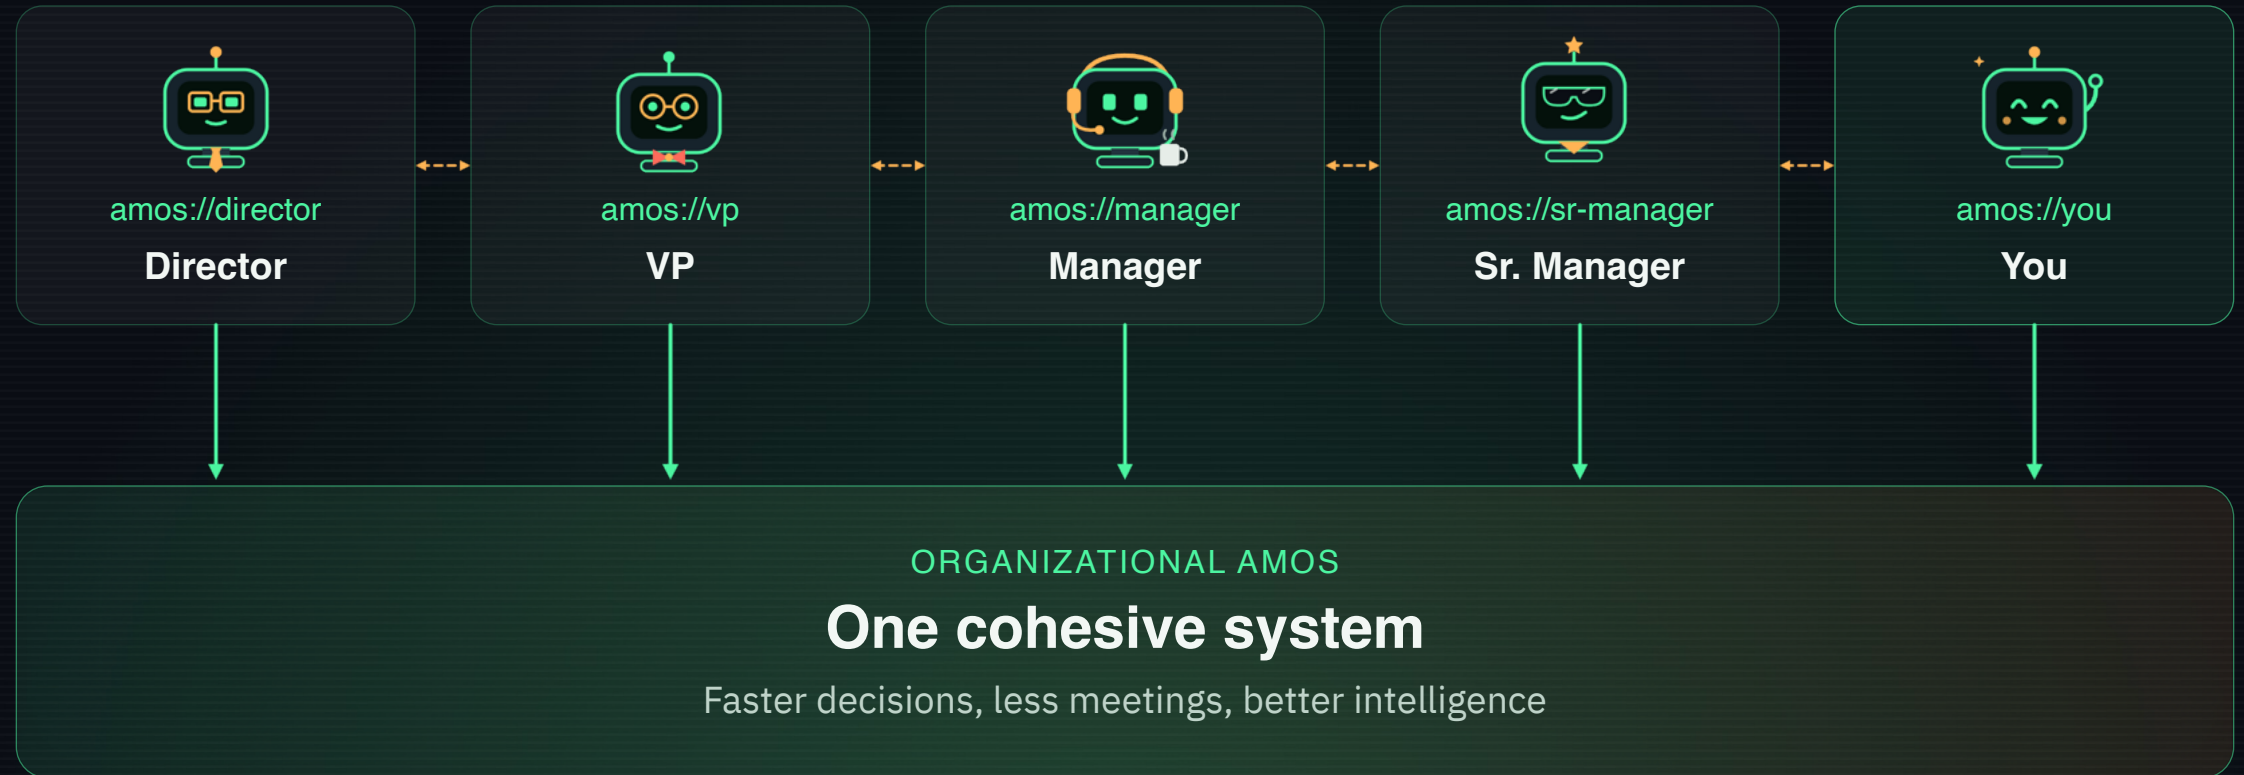

— Antoine de Saint-Exupéry

\$ man amos

Introducing AMOS

The **Agentic Management Operating System**: personal systems, connected into one.

Hi, I'm MAGELLAN

\$ man amos-model # the four levels

The AMOS model

LEVEL 1 Basic

Tools

Obsidian + Codex / Cowork

Knowledge Base

Working, longterm, input, output

LEVEL 2 Advanced

Toolkit

Skills, triggers, agents, hooks

Control Plane

Bridge, search, registry, retros

LEVEL 3 Extreme

Apps

Browser, desktop, dashboard, server

Hardware

Radiator, badges, light, controls

LEVEL 4 Organizational

Standards

Shared conventions across teams

Records

MANIFEST: collective records

Reviews

PILOT: agentic change reviews

Prediction

FORECAST: predictive intelligence

\$ man amos-basic # level 1 · get set up

Basic AMOS

Tools — where you and your agent work together

Obsidian

\$ ~/vault

The editing surface:
A vault of plain markdown you and your agent share.

Codex / Claude Cowork

> amos, brief me on today_

The agent interaction surface:
where you ask, delegate and review.

Knowledge Base — the memory your agent reads and writes

Working Memory

~/vault/working/

Notes made by me and my
agent: notes, logs, state ++

Longterm Memory

~/vault/records/

Durable entities: people,
projects, customers, ++

Input

~/vault/inbox/

Messages, emails, transcripts,
exports from tools ++

Output

~/vault/output/

Results of our work: reports,
presentations, transcripts ++

\$ man amos-advanced # level 2 · start building

Advanced AMOS

Toolkit — turns habits into repeatable capabilities

Instructions & Commands

```
AGENTS.md DESIGN.md ...
```

Shape how your agent acts.

Skills & Plugins

```
/skill weekly-brief
```

Encode multi-step workflows and connect to tools.

Triggers & Automations

```
on: weekdays 07:00 -do: ...
```

Define conditions and actions that run workflows.

Agents & Hooks

```
agent: researcher, reviewer ..
```

custom and remote agents; deterministic lifecycle hooks.

Control Plane — turns conventions into stable interfaces

Bridge

```
GET /amos/v1/records
```

API and MCP interface for common functions.

Search

```
amos search "risks"
```

Retrieval and matching for finding context.

Registry

```
amos registry ls
```

Directory of AMOS capabilities.

Self-Improvement

```
amos retro --apply
```

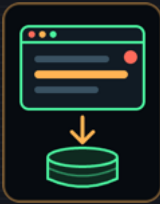

Standard mechanisms for continuous improvement.

\$ man amos-extreme # level 3 · go further

Extreme AMOS

</> Apps — connect your AMOS into your daily workflows

DISCOVERY

Browser extension
for recording
important artifacts

ENDEAVOUR

Desktop app
connecting into your
operating system

ASTROLABE

Dashboard to
visualize, manage
and monitor AMOS

TRAVERSE

Remote server for
hosting agents and
publishing artifacts

⚡ Hardware — physical components that extend into your environment

SEMAPHORE

eInk information
radiator for key
messages

SIGNAL

Simple badges for
quick notifications

ALERT

Indicator light for
notifications and
status

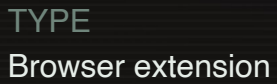

HELM

Buttons and pedals
for interacting with
AMOS

\$ man amos-organizational # level 4 · work together

Organizational AMOS

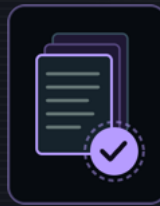

Practices — how the organization adopts AMOS together

Diffusion

Every leader builds an AMOS; we learn together

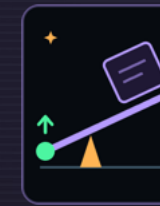

Standards

Shared conventions so every AMOS fits together

Integration

Systems that connect each AMOS into one

Leverage

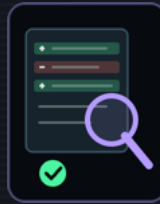

Use the integrated system to run the organization

Big Ideas — shared capabilities that help run the organization

MANIFEST

Collective record keeping: up to date, accurate, available to people and agents

PILOT

Agentic reviews that come back to the channel in minutes, not hours

FORECAST

Predictive intelligence from signals, data and records

MANIFEST: Collective Record Keeping

Up-to-date, accurate records at your fingertips — and your agents'
